FOOTCROW.

4th February.

Mr. M. S. Linnart arrived here on the last instant will remain in port for a few days.

On Thursday last a boat containing a man, a bad and foot, who reported that his it had been pirated last night before. His

[illegible]

Up-shew.

One of the sporting men here has complained of the scarcity of game this season is now under considering the number of native "shoot-men" there are about now, all the country is full of them. He said it almost constantly worried by them. The market is said to be there being plenty of game about, whether a day passes that pheasants, partridges, quails and hares are not shot in abundance. Strange to say, in spite of the late severity of the weather, woodcocks have been scarce. Winter snipe have been plentiful, while the ducks are not so numerous. It is almost certain that there is a supply of them. If there are not been many will increase in the market. It because the wilds there is too wily even for the rifle.

On the 14th inst. we made mention of the rise in price of all commodities in daily use as food for the natives. The rise was then thought to be due to the fact that the weather was so much colder and the natives, but this does not turn out to be the cause. Rice is really scarce, and may be judged from the Authorities doing business in the market. The rice is so scarce that people there although there is a scarcity of goods supplies have been ordered by telegraph that should be here very shortly, and exported them for to assist in the market. The rice did not appear, it may be mentioned, until after the walk in the neighborhood of the Chinese and French Commissioners' gardens. It was the first rice reduced. "Is the situation regarded as serious is further shown by the authorities granting guards to the large rice dealers in the city.

The rice here was very poor, and so it was not far inland. Supplies wholly generally come from up-river did not arrive, the rice being barely sufficient for the dependant on the supports. In the absence of any good reason why there have not been coming in, we cannot imagine the fact with the large and the part of it is more than probable. In regard to the situation made by one of them last week, as reported that the rice does not occur are afraid of getting out to see what they know this fact is
